# Fundamental analysis

- At the first Friday of every month, US will release the fundamental report on their economy status , for example Non farm pay roll, unemployment rate, and more
- At the first Friday of July, (8-July-2011), US release the data, the non farm pay roll was a much less-than-expected 18,000 in June, less than the expected of 90,000
- The unemployment rate was 9.2% and was the highest in the year
- SO US currency will ↓ ↓ ↓ ↓ ↓

12:30

United States

Unemployment Rate (Jun)

9.2%

9.0%

9.1%

## • UNEMPLOYMENT RATE

Actual: **9.2%**    Cons.: **9.0%**    Previous: **9.1%**

The Unemployment Rate released by the [US Department of Labor](#) is the number of unemployed workers divided by the total civilian labor force. If the rate is up, it indicates a lack of expansion within the US economy. Therefore, a decrease of the figure is seen as positive (or bullish) for the USD, while an increase is seen as negative (or bearish).

12:30

United States  
Nonfarm Payrolls (Jun)

18K

90K

25K

## • NONFARM PAYROLLS

Actual: **18K**    Cons.: **90K**    Previous: **25K**

The nonfarm payrolls released by the [US Department of Labor](#) presents the number of people on the payrolls of all non-agricultural businesses. The monthly changes in payrolls can be excessively volatile. Generally speaking, a high reading is seen as positive (or bullish) for the USD, while a low reading is seen as negative (or bearish).
